DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 5 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 5 and 15 it is unclear if the limitation "a predetermined value" is the same predetermined valve recited in claim 4 and 14.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Abo et al (US 6,253,137).

Abo et al disclose a control system comprising: an oil pump (51) operative to produce an oil pressure and an oil flow amount which are supplied to the CVT (col. 3 lines 32-39); a pressure regulator valve (53) operative to regulate the oil pressure

Application/Control Number: 10/662,442

Art Unit: 3682

produced by the oil pump; a belt lubricating oil supply passage for supplying oil to the belt on a downstream side of the pressure regulator valve (col. 6 lines 23-25); engine operating condition detecting means (84) for detecting an engine operating condition and generating a signal indicative of the engine operating condition detected (col. 8) lines 46-53); and a controller (76) for controlling the oil flow amount based on the signal (col. 8 lines 54-56), the controller being programmed to: calculate a CVT input torque based on the signal (col. 4 lines 35-42); calculate a required belt lubricating oil flow amount to be supplied to the belt on the basis of the signal and the CVT input torque (col. 6 lines 17-27); determine a minimum speed of the oil pump based on the required belt lubricating oil flow amount(col. 4 lines 63-67); control the oil pump at the minimum speed (it is inherent that once the controller determines the required oil flow amount, the speed at which the pump operates will be the required minimum speed), an oil temperature sensor (84), a throttle position sensor (62), a primary pulley (31), a primary pulley speed detecting means (66), a secondary pulley (32), a secondary pulley speed detecting means (67), and an oil cooler (56).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure

6,626,781	Van Der Kamp et al	(lubrication system)
5,112,280	Sato	(cvt)
6,677,685	Pfleger et al	(controller)
6,615,966	Kato	(lubrication control)

Application/Control Number: 10/662,442

Art Unit: 3682

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vicky A. Johnson whose telephone number is (571) 272-7106. The examiner can normally be reached on Monday-Friday (7:00a-3:30p).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Bucci can be reached on (571) 272-7099. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
